Pioneers of Eco-Sustainable Hard Surfaces

Curava is a sustainable, eco-friendly hard surface that contains 60% recycled glass material, helping to ensure a greener planet. Curava eco-sustainable hard surfaces contribute to meeting certifying LEED requirements.

Where Does the Glass Come From?

100% of the glass used in Curava is recycled. The glass is collected from landfills and other resources from post-consumer and post-industrial waste that includes discarded glass bottles, windows, and windshield glass.

**Product colors shown are not an exact representation of the true surface color. Be sure to confirm your selection with an actual sample.*
